

MSA 02

Magnetic Field Probe (active)

Short description

The MSA 02 magnetic field probe is designed for measuring burst magnetic fields with high resolution and sensitivity. It is operated with the 05R, 05U, and 05K changeable probe heads. The MSA 02 has a built-in preamplifier and is battery-powered. The MSA 02 is used in connection with the SGZ 21 burst generator.

Scope of delivery

- 1x 05K black, Probe Head for MSA 02
- 1x 05R white, Probe Head for MSA 02
- 1x 05U orange, Probe Head for MSA 02

Technical parameters

Resolution	< 1 mm
