

# XF-R 400-1

H-Field Probe 30 MHz up to 6 GHz

## Short description

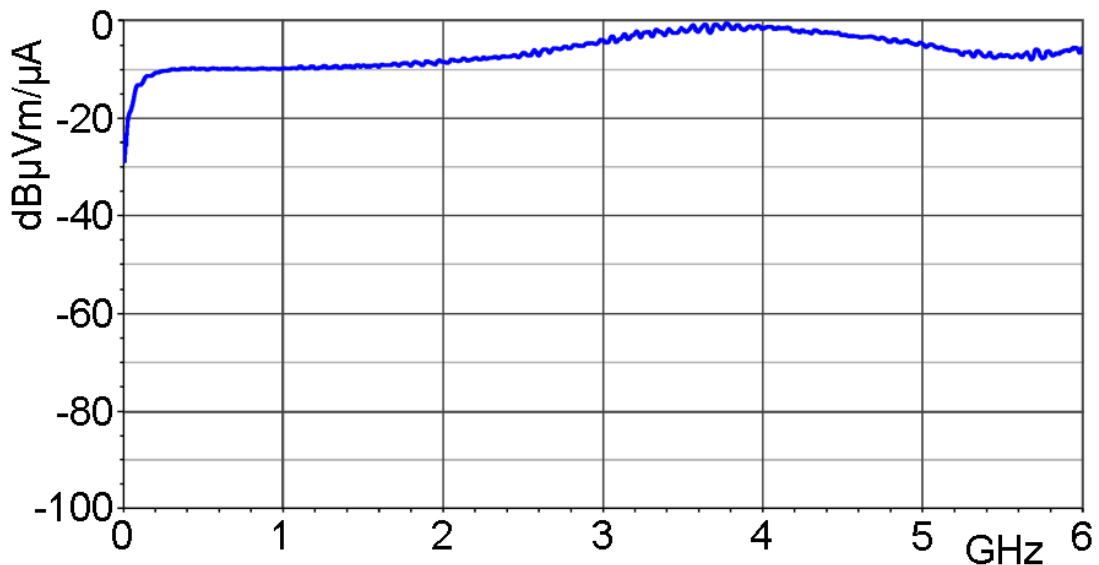

Due to its large diameter (25 mm) and its high resolution, the XF-R 400-1 H-field probe is suitable for measurements at distances up to 10 cm around assemblies and devices.

The XF-R 400-1 is a passive near-field probe. In principle it has the same structure as the XF-R 100-1 and XF-R 3-2 probes. The near-field probe is small and handy. It has a current attenuating sheath and, therefore, is electrically shielded. It can be connected to a spectrum analyzer or an oscilloscope with a  $50 \Omega$  input. The H-field probe has an internal terminating resistance.

## Technical parameters

Frequency range	30 MHz ... 6 GHz
Probe head dimensions	$\varnothing \approx 25$ mm
Connector - output	SMA, female, jack
Weight	15 g

Frequency response [dB $\mu$ V] / [dB $\mu$ A/m]

# XF-R 400-1

H-Field Probe 30 MHz up to 6 GHz

H-field correction curve [dB $\mu$ A/m] / [dB $\mu$ V]

Current correction curve [dB $\mu$ A] / [dB $\mu$ V]

# XF-R 400-1

H-Field Probe 30 MHz up to 6 GHz
